Key findings

- 48 organizations were listed in June 2020, +100.0% against 24 in the month before.
- maze was the most active group with 21 listings (43.8% of the month). The five most active groups account for 89.6% of all listings.
- Manufacturing was the most listed sector with 18 listings (37.5%), followed by Technology (8).
- United States was the most listed country with 21 listings (43.8%).
- The busiest day was 2020-06-01 with 15 listings.

Who is behind the listings

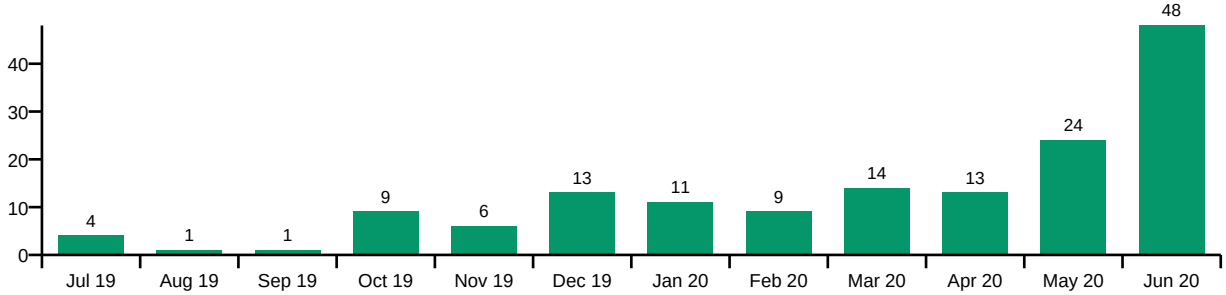

Dark: maze (43.8%). Grey: the next four groups (45.8%). Light: all other groups (10.4%).

What this means for your team

- Activity is concentrated: five groups (maze, ragnarlocker, revil, doppelpaymer, netwalker) made 89.6% of the month's listings. Make sure your monitoring and threat briefings cover them first.
- Manufacturing had the most listings (18). If you work in it, or buy from it, check whether your suppliers were named this month.
- Listings rose 100% on the month before. Confirm that alerts for newly named organizations reach someone who acts on them the same day.

Listings per month, last 12 months

Data: public ransomware leak-site listings, compiled by Ransomware Tracker by ExposureDrift from open threat-intelligence sources. A listing is a claim made by a criminal group, not a confirmed breach.

About these numbers

Listing	A post on a ransomware group's leak site naming an organization. It is the group's claim, not a confirmed breach.
Date	We count a listing on the date we first saw it, which can be days or weeks after the attack.
Share	The group's, sector's or country's part of all listings in the month.
vs last month	Change in listings from the month before. 'new' means none the month before. Colour shows direction only.
Limits	Many victims are never listed, so this describes leak-site activity, not the true number of ransomware incidents.
