listings this month	vs previous month (675)	groups that posted	groups seen for the first time

Key findings

- 613 organizations were listed in January 2025, -9.2% against 675 in the month before.
- akira was the most active group with 75 listings (12.2% of the month). The five most active groups account for 46.7% of all listings.
- Professional Services was the most listed sector with 106 listings (17.3%), followed by Manufacturing (102).
- United States was the most listed country with 262 listings (42.7%).
- 3 groups listed for the first time this month.
- The busiest day was 2025-01-27 with 75 listings.

Who is behind the listings

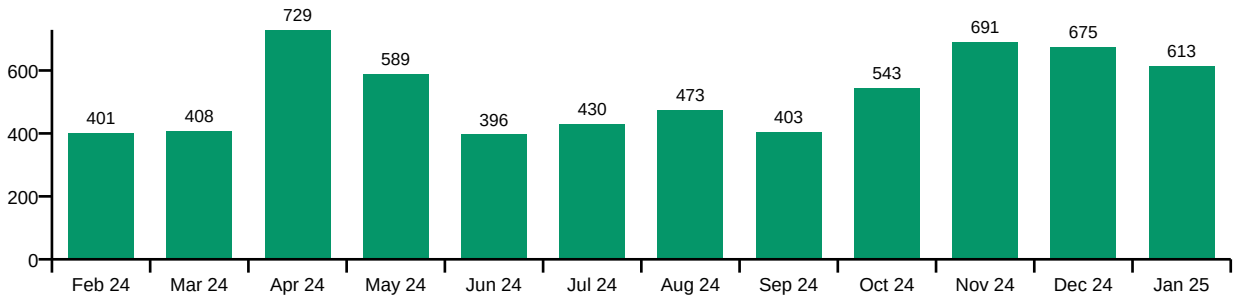

Dark: akira (12.2%). Grey: the next four groups (34.4%). Light: all other groups (53.3%).

What this means for your team

- Activity is spread out: the five busiest groups (akira, babuk2, clop, lynx, ransomhub) made only 46.7% of listings, so watching a few groups is not enough. Track listings by sector and supplier instead.
- Professional Services had the most listings (106). If you work in it, or buy from it, check whether your suppliers were named this month.
- 3 groups listed for the first time. Add new names to your watchlist and note which sectors they went for.

Listings per month, last 12 months

Data: public ransomware leak-site listings, compiled by Ransomware Tracker by ExposureDrift from open threat-intelligence sources. A listing is a claim made by a criminal group, not a confirmed breach.

About these numbers

Listing	A post on a ransomware group's leak site naming an organization. It is the group's claim, not a confirmed breach.
Date	We count a listing on the date we first saw it, which can be days or weeks after the attack.
Share	The group's, sector's or country's part of all listings in the month.
vs last month	Change in listings from the month before. 'new' means none the month before. Colour shows direction only.
Limits	Many victims are never listed, so this describes leak-site activity, not the true number of ransomware incidents.
