listings this month	vs previous month (783)	groups that posted	groups seen for the first time

Key findings

- 708 organizations were listed in June 2026, -9.6% against 783 in the month before.
- qilin was the most active group with 78 listings (11.0% of the month). The five most active groups account for 38.7% of all listings.
- Professional Services was the most listed sector with 134 listings (18.9%), followed by Manufacturing (121).
- United States was the most listed country with 199 listings (28.1%).
- 8 groups listed for the first time this month.
- The busiest day was 2026-06-15 with 60 listings.

Who is behind the listings

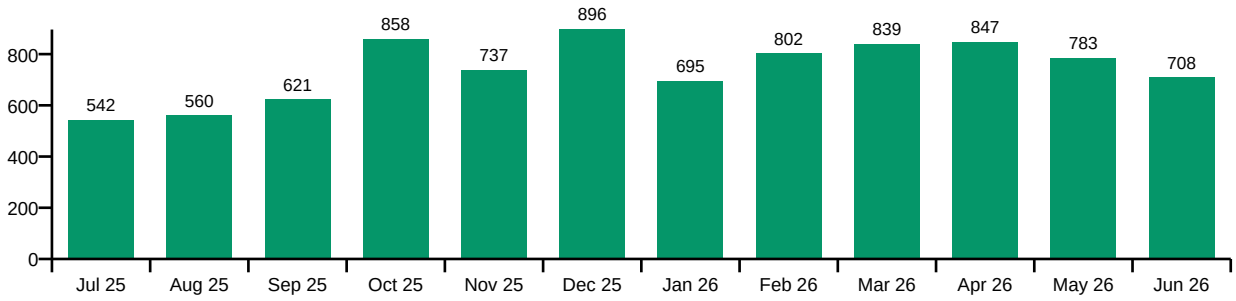

Dark: qilin (11.0%). Grey: the next four groups (27.7%). Light: all other groups (61.3%).

What this means for your team

- Activity is spread out: the five busiest groups (qilin, thegentlemen, lockbit5, akira, incransom) made only 38.7% of listings, so watching a few groups is not enough. Track listings by sector and supplier instead.
- Professional Services had the most listings (134). If you work in it, or buy from it, check whether your suppliers were named this month.
- 8 groups listed for the first time. Add new names to your watchlist and note which sectors they went for.

About these numbers

Listing	A post on a ransomware group's leak site naming an organization. It is the group's claim, not a confirmed breach.
Date	We count a listing on the date we first saw it, which can be days or weeks after the attack.
Share	The group's, sector's or country's part of all listings in the month.
vs last month	Change in listings from the month before. 'new' means none the month before. Colour shows direction only.
Limits	Many victims are never listed, so this describes leak-site activity, not the true number of ransomware incidents.
